

### Shows Suicide Cowardly Means of Escape

If you are discouraged and blue and life looks hard and the future hopeless today, do not grow cowardly and think of self-destruction as the door of escape.

You did not make yourself. You cannot unmake yourself.

By no process of reasoning can you explain this wonderful marvel of the life principle within you. Science has found all the ingredients which compose an egg chemically, and an egg which resembles the hen's product can be manufactured.

But it will not produce life. A certain low order of fish life has been produced in the chemical laboratory. But the germs spawned by the fish had first to be employed.

Nothing can produce life but that unnamable, mysterious Power back of the universe. Created beings carry on the life principle through succeeding generations and centuries, but its production and creation remain God's secret. He who imagines he can destroy that principle is as great a fool as he who says he can explain it. And he is a criminal besides.

**Death Only Shifts Scene.**  
All that death does is to shift the scene of action to another form and plane.

If you are miserable and unhappy you do not become happy by going to another town or state. You carry your wretchedness with you.

It is precisely the same when you rush out of the body by your own act. If you are called out of the body by the same Power that brought you into the world, then it is safe to suppose that conditions are ready for you to start anew in another place.

Wait for that call.

The actor who rushes upon the stage before his cue is given spoils the play and ruins his own chances for glory.

Keep behind the earthly scenes until you hear the call. Meanwhile think well of your lines and be ready to do your best when called.

However discouraged you may be thousands of successful and happy people in the world today have been just as discouraged and unhappy as you are at some time in their lives.

In Greater New York there lives today a woman, who less than a year ago harbored dark, despairing thoughts of suicide.

She had made a mistake; she had lost her self-respect and every imaginable trouble seemed to threaten her. Hunger and misery for those dear to her and dependent upon her, with despair and remorse, all combined to turn her thoughts toward the coward's goal—suicide.

But seeming accident deterred her, and now in less than a year all has changed. She has risen to new spiritual and moral heights, she has obtained work and is leading a good, useful, Christian life.

She is making those dear to her happy and comfortable.

How much better than to have sunk into the depths of a life-long sorrow by a rash attempt at self-destruction—an attempt which destroys only the outer shell, but leaves the real being to suffer on until it works out and expiates its crime.

**Your May Scatter Troubles.**  
No matter what your troubles are today, a year may scatter them and leave you with new hope and new interest in life.

If you are an invalid a year may remove your strength.

This is a wonderful age, and people are beginning to realize that health is greatly within one's own control.

Simple food, well masticated, as little meat as possible, much water, continual deep breathing to feed the body with pure oxygen, and continued assertions of health and strength, from the source of all energy, will restore three-fourths of the invalid on earth, with no aid of medical skill. A two or three months' or even weeks' diet of raw vegetables, or milk and eggs, would restore half of the remainder.

A couple of weeks the right mental attitude and exercise.

The day is nearing when sickness will mean disgrace or lack of brain. If you have no money and no employment make up your mind that both are coming to you. If starvation seems imminent go to the nearest house in the country and tell your condition. Not one door in 100 will shut you out before bestowing a saving meal. If you are in the city the blessed Salvation Army will help you, and will tell you of places to find shelter until you can look about and gain courage for a fresh start.

Unlike most of our orthodox churches, their rooms are open night and day, and in all parts of the city in every city in the Union they are to be found. They are doing just the work Christ did when upon earth. No matter if your creed is not theirs to the letter, they will help you to rise and keep out of the morgue and the Potter's field.

**Brace Up Morally and Mentally.**  
After you have rested for a day brace up morally and mentally, and declare that you are going to make a new start, and that the way will open, must open, and has already opened to you for a new life.

This assertion will strengthen you amazingly. Believe in yourself, in your right to a useful, happy and successful life. Remember how many men have been in poverty and despair and have risen out of them to power and usefulness afterward.

Trust in the invincible force of your own divine soul to become one of these and believe the Angels of Light who hear the cry of despairing ones on earth will strengthen you.

The way will and must open for you if you turn your eyes away from death and despair, upward and inward.

The world needs you or you would not be.

Your place is waiting for you—and it!

### BAD COLD? FEEL HEADACHY, DULL AND STOPPED UP

First dose of "Pape's Cold Compound" Relieves all gripe misery.

Don't stay stuffed up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken will end gripe misery and break up a severe cold either in the head, chest, body or limbs.

It promptly opens clogged-up nostrils and air passages; stops nasty discharge or nose running; relieves sick headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only 25 cents at drug stores. It acts without assistance, tastes nice, and causes no inconvenience. Don't accept a substitute. Adv.

\*\*\*\*\*  
**WEATHER FALLACIES.**  
\*\*\*\*\*

Andrew H. Palmer of the United States weather bureau takes occasion in the Popular Science magazine to explode some fallacies regarding the weather. He views popular beliefs concerning the weather that have prevailed for centuries with the cold eye of science and leaves the old-fashioned almanac without a leg to stand on.

The supposed influence of the moon, the planets or the stars, he says, is probably the most widespread of all popular misconceptions concerning the weather. Meteorologists are now unanimous in the opinion that the influence of the moon, the planets and the stars, excepting only the sun, is practically nil as far as terrestrial weather is concerned.

Neither is there any indisputable connection between the weather of one day and that of subsequent weeks or seasons. In other words, we are not to presume that because we have had a severe winter we will likely have an early spring. Nor are we to put any reliance in the state of the weather on Feb. 2 as a portent of the weather to be expected for the following six weeks. Ground hogs day has no standing in science. Nor is there any basis for prevalent notions that a showery Easter Sunday is followed by seven showery Sundays, or that a rainy St. Swithin's day, July 15, portends 40 consecutive days of rain.

Spring and summer are the seasons of the greatest rainfall over the United States.

The weather does not come from Medicine Hat, either. The frequent expression in winter, says the expert, that "another storm is brewing at Medicine Hat," is based on a false association of that station with the origin of our weather. Neither Medicine Hat nor any other single station serves as a starting point. Mr. Palmer next disproves that animals have any knowledge of coming weather changes, declares that rain is never caused by convulsions such as take place during a great battle, or during a particularly insane Fourth of July; that there is no such thing as a regularly recurring Indian summer; that the effect of forests on the weather is practically nil; that night air is probably no more dangerous for convalescents than day air, and that there is no such thing as an equinoctial storm. He even questions the proverb that "lightning never strikes twice in the same place." The idea is not only without scientific basis, but the opposite may be nearer the truth, for if the conditions which attracted a lightning discharge are not disturbed by such a discharge there is a great probability that they will attract the lightning a second time," he reasons.
